

GArmor Basecamp P Product Overview

Customer and dealer edition

We build the GArmor Basecamp P on the Polaris RANGER XD 1500 NorthStar Ultimate for camping, remote-property access, and extended outdoor trips. Three-seat and six-seat models retain the factory enclosed cab and combine off-road transport with a rear camper. Choose a soft-shell pop-up or a compact hard-shell camper to suit your travel and camp setup.

Three Seat Soft Shell

Basecamp P three-seat soft-shell configuration

The single-row RANGER carries three occupants in the factory cab. Its shorter wheelbase suits smaller groups and tighter access routes. The rear pop-up camper provides a raised fabric upper enclosure, sleeping space, screened windows, and a rigid roof with solar equipment.

The soft-shell layout includes a side awning for sheltered camp space, rear access steps, exterior equipment storage, and camp lighting. The camper closes down for travel; equipment and loose items are secured before moving.

Six Seat Soft Shell

Basecamp P six-seat soft-shell configuration on the RANGER CREW

The CREW platform carries six occupants in two factory seating rows and retains all four cab doors. It serves larger groups that need additional seated transport while carrying the camper in the rear cargo area. Vehicle seating capacity and camper sleeping capacity are separate specifications.

Choose the Seating Model

Configuration	Three seat	Six seat
Factory seating	3 in one row	6 in two rows
Factory doors	2	4
Base platform	RANGER XD 1500	RANGER CREW XD 1500
Typical use	Smaller groups and compact access	Larger groups and crew transport
Camper choices	Soft shell or hard shell	Soft shell or hard shell

Both models retain NorthStar cab comfort, factory glazing, and off-road drive systems. The Basecamp P is unarmored.

Three Seat Hard Shell

Basecamp P three-seat compact hard-shell configuration

The hard-shell package uses a compact rigid rear camper with a flat roof and a thin forward extension above the factory cab. The shell follows the vehicle width and keeps the rear body close to the cargo-bed footprint. The shallow roof extension preserves the compact profile of the Basecamp layout.

Rigid sidewalls, a side window, rear entry, and exterior storage provide an enclosed camp area. The hard-shell exterior has no deployed side awning or side slide-out. Solar equipment and exterior lighting are arranged along the roof and camper body.

Camp Interior

The camper provides a dedicated sleeping area, interior lighting, and space for organized personal equipment. Bedding, storage, ventilation, and electrical selections are specified with the customer so the interior suits the intended trip length and camp routine.

Six Seat Hard Shell

Basecamp P six-seat compact hard-shell configuration

The six-seat hard-shell model pairs the longer CREW cab with the same compact rear-pod design. A thin roof extension runs above the cab while the camper body stays behind the factory passenger compartment. Both seating rows and all factory cab doors remain accessible.

Choose the Camper

Feature	Soft shell	Hard shell
Upper enclosure	Raised fabric pop-up	Fixed rigid walls
Roof arrangement	Rigid lifting roof	Flat roof with shallow cab extension
Side shelter	Deployed awning	No side awning
Camp access	Rear steps and entry	Rear entry
Roof equipment	Solar equipment	Solar equipment

Polaris Base Vehicle Specifications

These published 2027 NorthStar Ultimate figures describe the factory vehicles before the camper and GArmor equipment are installed. Completed Basecamp P dimensions, weight, and remaining payload depend on the selected package.

Base specification	Three seat	Six seat
Engine	1,498 cc gasoline triple	Same
Rated power and torque	110 hp and 105 lb-ft	Same
Transmission	STEELDRIVE automatic	Same
Length width height	137 × 65 × 78 in	164 × 65 × 78 in
Wheelbase	95 in	127 in
Turning radius	15.1 ft	19.4 ft
Estimated dry weight	2,826 lb	3,282 lb
Published payload	1,675 lb	1,650 lb
Cargo box capacity	1,500 lb	1,500 lb
Towing rating	3,500 lb	3,500 lb
Fuel capacity	13.6 gal	13.6 gal
Ground clearance	15 in	15 in
Suspension travel	12 in front and rear	Same
Tires and wheels	30 in tires and 15 in wheels	Same

Factory Cab and Vehicle Systems

The retained enclosed cab includes heat, air conditioning, defrost, power windows, a glass windshield, and a wiper and washer. Ultimate equipment includes heated front seating, a 7-inch RIDE COMMAND display, GPS mapping, a rear camera, and a 6,000-pound winch. On-demand all-wheel drive and power steering support off-road travel.

Camper equipment, occupants, supplies, water, and applicable trailer loads count toward the vehicle ratings. Installed equipment reduces available payload. Roof and cargo-bed loads remain within the limits of the completed installation.

GArmor Camper Equipment and Selections

We configure the Basecamp P around the seating model, camper enclosure, sleeping layout, storage needs, and electrical equipment. The quotation lists the equipment supplied with each vehicle.

Basecamp Equipment

- Rear camper installation with the factory enclosed cab and seating retained.
- Soft-shell pop-up enclosure with side awning, or compact rigid hard shell with a shallow extension over the cab.
- Dedicated sleeping area, rear entry, and organized interior storage.
- Interior camp lighting and exterior work lighting.
- Roof solar equipment and camper electrical integration, sized for the selected appliances.
- Exterior equipment storage and rear access hardware matched to the camper layout.

Available Customer Selections

Customer selections can include auxiliary batteries, 12-volt and USB outlets, an inverter and 110-volt outlets, additional solar capacity, refrigerator storage, water storage, and a compact cooking arrangement. Camper heating, ventilation, and air conditioning can be specified separately. The factory cab climate system serves the passenger cab; camper climate equipment is a separate selection.

Typical Applications

The Basecamp P supports overnight camping, outdoor recreation, ranch and remote-property visits, and equipment transport to a field camp. Choose the three-seat model for a smaller group and shorter vehicle footprint, or the six-seat model when additional factory passenger seats are needed.

Ordering and Production

Select the seating model and camper type, then confirm the sleeping arrangement, electrical loads, storage, water, and appliance selections. The final vehicle specification records camper dimensions, installed weight, remaining payload, sleeping capacity, and operating limits. Pricing and delivery timing are provided in the quotation.
